PROFILE SUMMARY

Business Analyst with 2 years at an MSME-focused consulting firm, serving as primary client point of contact on a UNHCR field research engagement covering 81 participants across 15 camps and 3 cities, and coordinating CII programmes spanning 80+ MSMEs across two states. Built a reporting dashboard from scratch and a presales research template now used organisation-wide. Progressed from execution support to primary report-builder for all major clients, as recognised by senior leadership. Currently completing an MBA and available to join immediately

WORK EXPERIENCE

Business Analyst - Billion Plans, a unit of Poornatha

Poornatha (Global Skilling Organisation) | MSME-focused Business Consulting Group

May 2024 - July 2026

- Served as primary point of contact between UNHCR and Poornatha on a field research engagement across 81 Sri Lankan Tamil refugee women in 15 camps across Madurai, Chennai and Coimbatore; designed the survey instrument, coordinated 15 focus-group discussions, and co-authored a final report accepted and presented at a conference - the closing event was attended by the Commissioner of Rehabilitation and Welfare of Non-Resident Tamils, Regional Executive Director, Food Corporation of India to action measures.
- Coordinated CII field programmes across Tamil Nadu and Karnataka reaching 80+ MSME participants across 2 sessions; consolidated 40-50 survey responses per session via Excel and Power Query, identifying that most MSMEs had a business plan but no finance plan - findings were shared with another regional team, fed into a follow-up session, and incorporated into a larger CII report.
- Built a CII reporting dashboard from the ground up where no prior process existed: automated Google Forms data through auto-updating pivot tables and charts, delivered as a PPT report to programme leadership and clients, and later extended to a completed Power BI version.
- Designed a standardized presales research template (competitor intelligence, MSME client background, pricing benchmarks), replacing an inconsistent, unformatted format that was losing client information; adopted organisation-wide across analysts. Streamlined meeting documentation using AI-assisted transcription for minutes.
- Progressed from execution support to primary report-builder for all major client-facing deliverables (CII, UNHCR), as explicitly recognised by senior leadership; trained 2 new hires plus 5+ interns and independently led client meetings, both online and offline.

Intern - DNV & Associates

Oct 2023

- Completed an internship gaining exposure to professional accounting and advisory practice.

SKILL

- Business Analysis:** Requirements gathering & elicitation, stakeholder analysis & mapping, gap analysis, process mapping, SOP documentation, KPI definition & tracking
- Data & Reporting:** Advanced Excel (Power Query, pivot tables, automation), Power BI dashboards, Google Forms data pipelines, data cleaning & validation
